# Surpass Chainlink LoFi Wireframe

Total pages: 9 || Total modals: 7 to 12

## Approval Signatures:

Alan Abed (developer):_____

Keegan Anglim (developer):_____

Christine Dang (UXUI designer):_____

Total pages for Homepage: 1 to 3 || Total modals for Homepage: 2 to 5

**Homepage and login wireframe:**   https://wireframe.cc/8DNGCM

*Notes*:  * *To see the entire wireframe, grab and drag the main grid page to the left.*
     * *The smaller boxes are modals (can be changed to full webpages)*
     * *Before logging in, users must select if they are distributing a survey or survey taker*
     * *We can also go with a one login system where the database searches for the account and leads users to the correct page (company side or survey taker side)*
     * *All users will be taken to the login page. If they are new, they can select the linked text at the bottom to 'create new account'*
     * *The start here button would lead to the 'company/survey taker' selection, then to the corresponding 'account creation' modal*
     * *Homepage will have banner image demonstrating steps and how it works*
          **There will be more details and images below the banner with more description for survey takers and survey distributers, ease of use, and security measures*
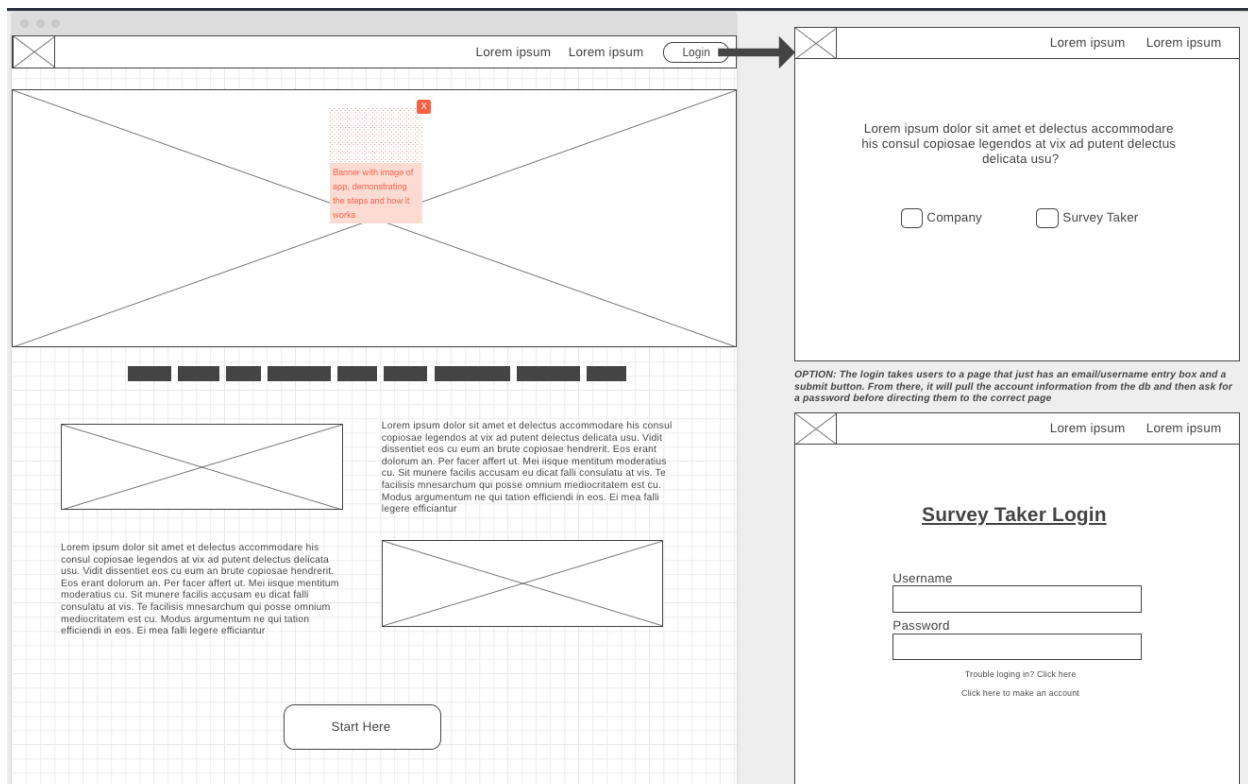

**Notes pt. 2**:   * 2 'account creation' modal options:
             * All users must attach their wallet from the start
                            - or -
             * All users will have the option to attach their wallet after creating their account
             * If they are full pages instead of modals, they will have the navbar (as shown)
               otherwise, the modals will have an exit button on the upper right hand corner in
               replace of the navbar

# SURVEY DISTRIBUTER DASHBOARD
Total pages for this section: 4 || Total modals for this section: 2

**Company dashboard, Survey creation wireframe (option 1):** https://wireframe.cc/daUCwz

***Notes:*** *\* Very simple design with 4 main buttons that lead to their corresponding page*
*\* Page designs will look exactly like the designs in **option 2**, except they will have their*
*own separate pages*

Lorem ipsum     Lorem ipsum     ( Logout )

## Welcome [Name of company]

Create a survey

Manage ongoing survey

Attach your wallet

Account settings

**Company dashboard, Survey creation wireframe (option 2):** https://wireframe.cc/7dEMoc

***Notes:*** *Option 2 has a fixed navigation bar on the left for all pages*
*     * **2 pages total** (main creation survey & final check before submission)*
*     * 'Final submission check' page has option to 'create a captcha' before submitting*
*     * Leads to 'Manage a survey' page, in case they want to edit or delete that survey*

**Company dashboard, Manage a survey page:** https://wireframe.cc/43STf4

***Notes:*** *\* Link created for users to post, as well as allow survey taker accounts to find survey*
*\* 'Success message' is displayed ONLY if they are coming from the 'create a new survey' page*
*\* Will list number of survey takers 'out of' the original amount entered*

***Scenario:***
*\* New user clicks on link from an advertisement or on Twitter.*
*\* They are directed to the homepage of the site, with the survey taker login modal open.*
*\* If they do not have an account, they can click on the link to create an account (located at the bottom of the modal).*
*\* From there, it will take them either to the **survey link they selected** OR take them to the **survey taker dashboard** with the 'take a survey' selected, where they can enter the survey link*

Confirm Survey Deletion

**Company dashboard, User settings page:** https://wireframe.cc/bUr77f

***Notes:*** *\* Will allow company to edit their company name, password, and wallet info*
        *\* Will have a 'delete account' modal option, with an 'enter password' safety, to prevent*
         *accidental deletion*

# SURVEY TAKER DASHBOARD
Total pages for this section: 4 || Total modals for this section: 4 to 6

**Survey taker dashboard, take a survey:** https://wireframe.cc/5VaVxR

***Notes:*** *\* Survey takers will have a drop down option to search for a survey to take along with a text box to enter the survey link*
*\* When they select 'start survey', the system will check that they have a wallet attached to their account. If they don't, a modal will pop up alerting them to attach their wallet, with a button to direct them to the 'account settings' page*

**Survey taker dashboard, take survey:** https://wireframe.cc/4wLgp8

***Notes:*** * *Captcha modal will pop up first. Once it has been passed, users will be directed to the survey*
* *Users have the option to exit out of the survey. Clicking on this button will trigger a modal, asking them if they are sure they want to quit and that their answers will not be saved. (They can either close the modal and return to the survey, or quit the survey and return to their dashboard)*
* Submitting the survey will check if all answers have been completed.
   * If there are missing answers, an alert will pop up, directing them back to the survey
   * If all answers have been completed, a success modal will pop up with information on their next steps (where to check their survey status and where to go if they want to take another survey. Clicking on the button will return them back to their dashboard

**Survey taker dashboard, previous surveys taken - case 1:** https://wireframe.cc/JWVCtc
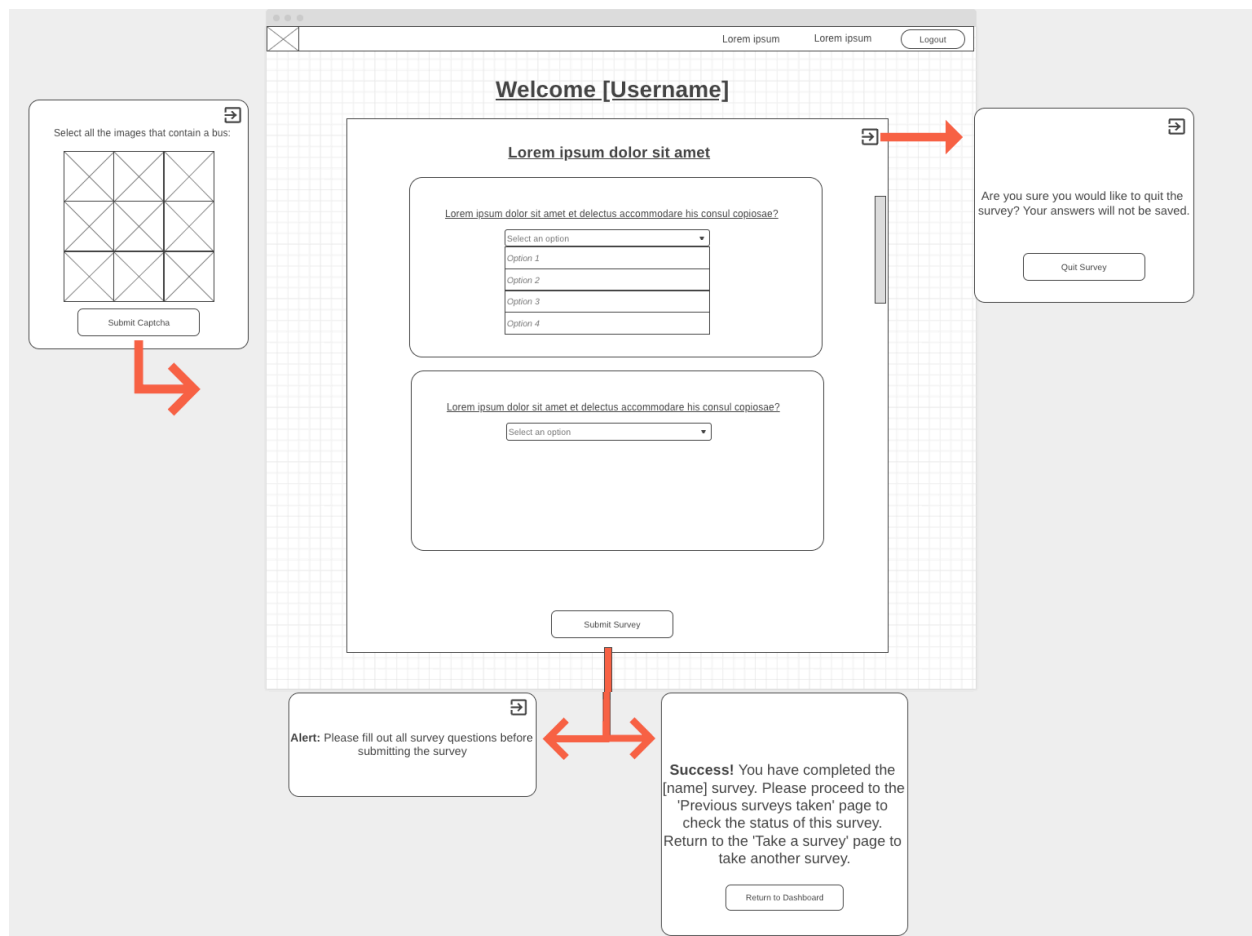

**_Notes:_** _* Will list information and status of each survey they have taken_
_* The 'Start Survey' button at the bottom will lead them to the 'Take a survey' page_

**Survey taker dashboard, previous surveys taken - case 2:** https://wireframe.cc/EP4sw4

**Notes:** *\* If the user has not taken any surveys before, their 'Previous surveys taken' page will display a message, directing them to take a survey*
